

8 TIPS *to Start the School Year Strong*

The inevitable last minutes of summer are ticking away. The countdown has begun for back-to-school once again, and this year contains more uncertainties than ever. However, these confusing times should not get in the way of the preparations that parents and kids should focus on for a successful school year.

To help parents and students start the school year strong, we've compiled eight tips—four for parents and four for students—to keep in mind as summer winds down and the school year begins.

Four things parents can do to help their children achieve better academic results:

1. Impose the two-week rule.

With later bedtimes over the summer, children need to ease back into their school routine rather than having a sudden change their first day of school. Using the last two weeks of summer to re-introduce a school year bedtime routine will make waking up on that first day a lot easier.

2. Reintroduce regular meal times.

During summer months, kids tend to grab a snack several times during the day. Parents can start reminding students to get back into a three-meal-a-day schedule in order to regulate their system into the back-to-school mode. Nutrition is an important factor in academic performance, and eating a healthy, balanced breakfast and lunch keeps kids alert throughout the day.

3. Create a family calendar.

Time management is tricky for everyone, especially kids and teens, but planning is an important way to save everyone's sanity. Having major deadlines, due dates, events and extracurricular activities in one place helps kids visualize their week, manage their time and stay on track.

4. Don't ditch good habits.

If you and your child have established a good summer learning routine, when school starts try not to forsake all of the fun reading, writing and art activities that kept your child engaged all summer.

Four important things that students can do to improve the academic quality of the school year, starting on day one:

1. Get organized.

Organization is not overrated. Keeping Zoom schedules, notes, projects and reading materials in logical order helps students find what they need right away, cutting down on time spent tracking things down, and allowing more time for actual studying.

2. Take good notes.

Yes, it does matter. Taking good notes helps keep kids' grades up, especially in middle or high school. To boost note-taking skills, students should practice picking out the "main ideas" in conversations, news reports, or magazine articles.

3. Concentrate.

It's important for students to concentrate and avoid distractions when an instructor is presenting. This will be even more critical with remote learning this year. Take good class notes, and review them as soon as possible to make sure you understand. If you don't, ask follow-up questions at the next class or email your teacher.

4. Speak up.

Students often can get tripped up by homework or test instructions, and they may be more hesitant to speak up during virtual classes. The "Chat" feature in Zoom can be helpful for students to ask questions if they don't understand testing or homework directions. Students should also listen carefully and spend plenty of time reading directions.
